Office Action Comments	10/600,126	MAO ET AL.						
Office Action Summary	Examiner	Art Unit						
	Mark A. Robinson	2872						
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status								
1) Responsive to communication(s) filed on 05 Ma	arch 2005.							
2a)⊠ This action is FINAL . 2b)☐ This	action is non-final.							
3) Since this application is in condition for allowan	ce except for formal matters, pro	secution as to the merits is						
closed in accordance with the practice under E	closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.							
Disposition of Claims								
4) Claim(s) <u>1-8</u> is/are pending in the application.	•							
4a) Of the above claim(s) is/are withdraw	4a) Of the above claim(s) is/are withdrawn from consideration.							
5) Claim(s) is/are allowed.								
6)⊠ Claim(s) <u>1-8</u> is/are rejected.								
7) Claim(s) is/are objected to.								
8) Claim(s) are subject to restriction and/or	election requirement.							
Application Papers								
9)☐ The specification is objected to by the Examine	r. ,							
10)⊠ The drawing(s) filed on <u>05 March 2005</u> is/are: a	a)⊠ accepted or b)⊡ objected to	by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).								
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).								
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.								
Priority under 35 U.S.C. § 119								
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).								
a) ☐ All b) ☐ Some * c) ☐ None of:								
1. Certified copies of the priority documents have been received.								
2. Certified copies of the priority documents have been received in Application No								
3. Copies of the certified copies of the priority documents have been received in this National Stage								
application from the International Bureau (PCT Rule 17.2(a)).								
* See the attached detailed Office action for a list	of the certified copies not receive	d.

DETAILED ACTION

Page 2

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application including the proposed correction which has been approved by the examiner. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Objections

2. Claim 7 is objected to because the claim depends from itself. Appropriate correction is required. Note that this claim has been treated as depending from claim 6 since antecedent basis for terms in claim 7 is found in claim 6.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2872

4. Claims 1-4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Gustin (US 2361287).

Page 3

Gustin shows a light reflector including a reflective base plate(10) having a front surface for receiving and reflecting light and a back surface on which light reflecting, multifaceted (flat faces with different angular orientations) cones(24,25) are formed. Note that the front surface of the plate is inherently partially reflective due to the difference in refractive indices at the plate-air interface.

Gustin further shows a mount or circumferential side wall(16) extending from the base plate and forming an open end to which a lid(18,20,11,etc.) is mounted.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gustin.

Art Unit: 2872

Gustin does not explicitly teach a light non-transmitting layer formed on the base and/or side wall. However, Gustin shows elements(16,18) formed on the base plate/side wall. Element 16 is a compressible gasket and element 18 is a mount/support. Gaskets are commonly made from non-transparent material (e.g. black rubber) and mounts/supports are commonly made from non-transparent metal. It would have been obvious to the ordinarily skilled artisan at the time of invention to make these elements of Gustin out of these known (non-transmitting) materials since they are readily available and known to provide the functions taught by Gustin.

7. Claims 1-3 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Michler (US 5039200) in view of Gustin.

Michler shows a light reflector including a light reflective base plate(22) having a front reflective surface and a back reflective surface(20), wherein the plate is bent to form a cylinder with the back surface defining an interior space.

Michler does not teach the back surface to comprise light reflecting cones. However, reflective cones are common and an example is shown by Gustin as noted above. It would have been obvious to the ordinarily skilled artisan at the time of invention to include light reflective cones in Michler's

Art Unit: 2872

reflector in order to provide the reflector with directional retro-reflection capability.

Response to Arguments

8. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2872

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Robinson whose telephone number is (571) 272-2319.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew Dunn, can be reached at (571) 272-2312. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on

Art Unit: 2872

access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
